About Africa Risk Compliance

Headquartered in Exeter and London, UK and with branch offices in Lomé, Togo, Cotonou, Benin and Lagos and Port Harcourt, Nigeria, Africa Risk Compliance Limited (ARC) was established to bring together a team of Africa and maritime security experts to address challenges faced by those operating in Africa. With roots in the security sector, our key service offering is the management and arrangement of security in the complex jurisdictions of the nations around the Gulf of Guinea.

In 2021, ARC expanded its service offering to provide a management service to arrange embarked armed guards in the Indian Ocean, and since 2021, risk management services to counter the threat of drug smuggling on merchant vessels, and journey management and on-shore vehicle services in Nigeria.

Reports 18 - 24 January 2024

- **18 January 2024. Drone Attack. 85nm S of Ash Shihr, Yemen.** The Master of a tanker reported that four UAVs came close to the vessel, with one hitting the water near the ship. Coalition forces responded. No injuries or damage to the ship reported.
- **18 January 2024. Drone Attack. 115nm SE of Aden.** A Master reported a UAV in close proximity to a vessel and an explosion in the water 30m off the port side. Coalition forces responded and the vessel and crew were reported safe.
- **23 January 2024. UAV Activity. 46nm S of Mokha, Yemen.** A UAV sighting was reported in the Bab el-Mandeb Strait.
- **24 January 2024. Suspicious Approach. 900nm N of Somalia Coast.** A bulk carrier was reportedly approached by one skiff whilst transiting through the Arabian Sea. One ladder was seen on board the skiff.
- **24 January 2024. Wider Conflict Incident. 50n, S of Mokha, Yemen.** A Master reported an explosion 100m from the vessel on its starboard side whilst transiting through the Bab el-Mandeb Strait. The vessel and crew have been reported safe.

Analysis

Since 2021, Iran has seized or attempted to seize more than 20 merchant vessels. Such incidents are often followed by claims in Iranian media that the merchant vessel had committed a crime such as hitting an Iranian vessel or for fuel smuggling. These latest incidents, in particular the willingness of Iranian forces to open fire, show serious disregard for the safety of crew and the environment. US Navy and other allied forces will likely further increase their patrols in the area.

Houthi and Iranian forces have used air-borne weapons against vessels, which is an evolution from the mines and water-borne IEDs (WBIEDs) previously used. **These are still considered a threat as well.** The conflict in Yemen and the war between Israel and Hamas have led to a direct increase in risk to merchant vessels in the area, especially those vessels calling at Saudi and Yemeni ports. Vessels should maintain watches against any air-borne activity and report any incidents to regional authorities.

Overall, the threat of Somalia-based piracy has substantially increased in the region. Eight Somali piracy incidents have been reported since 22 November 2023, including the hijacking of a bulk carrier in the Arabian Sea. The incidents have followed a long pause in piracy activity in the region, demonstrating that armed groups in Somalia are still willing and capable of pirate attacks. There is a high risk of robbery and theft at ports and anchorages in India and in ports on the East African coast. In ports in Africa, there is also a high risk of stowaways.

Heightened Threat in the Red Sea and Bab el-Mandeb Strait

On 14 November 2023, amid the current war between Israel and Hamas, Yemen's Houthi leader Abdul Malik al-Houthi, issued a warning that his forces could make further attacks on Israel and target Israeli-linked ships in the Red Sea and the Bab el-Mandeb Strait. Since the announcement we have reported on 48 related security incidents in the area, including suspicious approaches, calls to alter course, the hijacking of an Israel-linked commercial vessel in the Red Sea, and several missile and drone launches targeting commercial vessels in the area. Most of the incidents have occurred north of the Bab el-Mandeb Strait between the ports of Hodeidah and Mokha.

The pattern of action from the Houthis towards targeted vessels seems to be:

1. Contact a vessel by VHF ordering it to change course and sail towards a nearby port (likely Hodeidah), whilst claiming to be the "Yemeni Navy".
2. If the vessel disobeys or ignores the order, in previous incidents Houthis have then launched either a drone or a missile against the vessel.
3. Such incidents are then followed by a large amount of local social media activity, resulting in an "official" statement from the Houthi spokesman confirming the incident and vessel name.

It is important to note that despite the Houthi leader's initial claim that the group would specifically target Israeli vessels, all vessels calling at ports in Yemen or transiting through the Red Sea are at risk of being targeted. Several of the vessels that have been targeted have had little or no links to Israel, and it seems that there is rather an effort to target some of the largest shipping lines in order to gain attention. These companies are part of a growing list of shipping lines that have recently announced plans to reroute through South Africa's Cape of Good Hope or pause shipments through the Red Sea until further notice to protect crew and cargo.

There have also been several reports alleging that Iranian naval vessels have been stationed in the Red Sea and the Gulf of Aden to support the Houthis with intelligence and target acquisition. It has been noted that at least two vessels identified as part of the Iranian navy have changed position in the past week, with one, Behshad, maintaining a presence at the western end of the Gulf of Aden since 11 January 2024 and another, Shiba, transiting through the Gulf of Aden and the Red Sea starting on 12 January 2024. These allegations have not been confirmed, but the uptick in incidents and the locations in which they have occurred suggests a possible link.

Due to the frequency and seriousness of the incidents that have occurred in the past 30 days, the Red Sea, the Bab el-Mandeb Strait and the Gulf of Aden are “high risk” and the threat is considered high to all vessels. Crew should take precautions prior to entering the area so that they are ready to respond appropriately to any threat and emergency and should operate at MARSEC Level 3 whilst transiting through the area. The threat in ports in the Red Sea has also increased because they are located in the affected area and in range of Houthi missiles, but the threat in these ports is lower landside.

As this threat pertains to a wider geopolitical conflict and not piracy, embarked armed guards may not be able to counter all attacks by Houthi forces. If the vessel has embarked armed guards, they will be able to counter attempts to stop the vessel by a small craft. However, when facing overwhelming force by an aggressor such as multiple naval-style vessels or helicopters, the embarked team should stand down for the following reasons:

- Any action by an armed team onboard may be met with an overwhelming force from a helicopter or naval vessels, which would greatly endanger the safety of the crew.
- Attempts to engage with the boarding force may be seen as provocative and may result in poorer treatment of the armed guards and crew after the boarding force has taken control of the vessel.

On December 19 2023, the US Defence Secretary announced the establishment of Operation Prosperity Guardian, a coalition of more than 20 countries with the aim to secure the southern Red Sea and the Bab el-Mandeb Strait for commercial vessels. Naval vessels are currently present in the area, but they are likely unable to defend against every attack or render assistance to all vessels targeted by the Houthis.

On the night of 11 January 2024, US and UK naval and air forces carried out missile strikes on Houthi positions in Yemen in response to the ongoing attacks on merchant shipping and, more recently, on naval vessels involved in Operation Prosperity Guardian in the Red Sea. US defence officials say that 60 targets were hit at 28 Houthi militant locations. Following the strikes, a Houthi spokesperson stated that the rebel group would retaliate and expand its targets to include US and UK-linked vessels. UK and US forces carried out another round of strikes against eight Houthi targets on 22 January 2024.

Though all merchant vessels are currently at risk in the Red Sea, the threat from the Houthis is therefore heightened towards all Israeli, US and UK-linked vessels sailing through the Gulf of Aden, Bab el-Mandeb and Southern Red Sea.

Vessels implicated in drug smuggling

Areas of vessel used to hide drugs

N.B. Figures are based on current information at time of publication of this report, and may change over time as further information on previous incidents is received. The figures represent the number of incidents of drug smuggling/trafficking on merchant vessels from ports in Latin America to ports globally.

Current Threat Levels

Theft, Robbery & Stowaway
STS and NPA Anchorage: **HIGH**
Port Area: **HIGH**

Piracy & Kidnap for Ransom
STS and NPA Anchorage:
MEDIUM
Port Area: **LOW**

Reports 18 - 24 January 2024

Nothing to report.

Analysis

Lagos has seen a high number of stowaway incidents on vessels in anchorage and at berth. All vessels should carry out stowaway searches prior to departure and watch out for small boats around the rear of the vessel.

There remains a high risk of armed robbery and theft at all Lagos anchorages and across the port area. If spotted by crew and alarm raised, thieves and robbers will usually flee without altercation or threat to crew. Terminals inside the port have poor security infrastructure, so vessels at berth are easy targets for thieves, robbers and stowaways. It is recommended that vessels maintain a vigilant watch, especially at night and dawn and dusk, when visibility is poor. Ships should also stow and lock away any tools, ropes and valuables on deck.

Last Incident

- **11 September 2023. Armed Robbery (successful). Terminal D, Berth 10, Lagos port, Nigeria.** Robbers boarded a vessel whilst alongside in Lagos port. They stole a high pressure machine and a hose. The incident was reported to authorities. All on board reported as safe.

Current Threat Levels

- Delta Creeks and Rivers: **HIGH**
- Bonny River: **HIGH**
- Escravos/Forcados: **HIGH**
- Calabar River: **HIGH**
- Offshore Brass: **HIGH**
- Offshore Bonny: **HIGH**
- Deep Offshore Bonny: **HIGH**
- Deep Offshore Lagos: **HIGH**

Reports 18 - 24 January 2024

Nothing to report.

Analysis

The threat level across the Nigeria EEZ is still considered high.

Pirate attacks have demonstrated that the pirates have an excellent understanding of the geographical limits of security escorts and local Naval forces, and they have the ability to board vessels sailing at good speed using light-weight aluminium ladders. There remains a significant threat to all vessels up to 250nm from the coast of Nigeria. Merchant vessels avoiding Nigerian waters should still remain extremely vigilant as pirates have shown themselves capable of operating at significant distances from the shore, including outside of Nigerian waters.

Last Incident

- **2 December 2023. Armed Robbery. Near Brass, Bayelsa State, Nigeria.** Armed suspects reportedly attacked an unconfirmed number of fishing vessels off the coast of Brass. One fisherman was killed, another was wounded, and four others were kidnapped during the incident. Reports say the assailants also stole the engines and fishing gear from the vessels before fleeing the scene.

Current Threat Levels

Theft, Robbery & Stowaway

Lomé: **MEDIUM**

Cotonou: **MEDIUM**

Piracy & Kidnap for Ransom

Lomé: **MEDIUM**

Offshore Togo: **HIGH**

Cotonou: **MEDIUM**

Offshore Benin: **HIGH**

Reports 18 - 24 January 2024

Nothing to report.

Analysis

There remains a high threat in the waters offshore Benin and Togo, where vessels often drift awaiting berthing instructions, or carry out STS bunker operations. The area deep offshore Benin should be considered one of the most dangerous areas in the Gulf of Guinea, as there are minimal options for security services or effective response in the event of an incident offshore. Vessels should move further south and west to avoid this area, or move straight into anchorages where there is a greater Navy presence and maritime security services available.

Last Incident

- **3 April 2022. Illegal Boarding. 275nm S of Lomé, International Waters.** A bulk carrier sailing deep offshore in international waters was boarded by pirates armed with firearms. The crew moved to citadel after raising the alarm. The Italian Navy vessel Rizzo Luigi Rizzo (P595) arrived on scene and a Navy boarding team boarded the bulk carrier. It was confirmed that all 19 crew members reached the citadel safely. The pirates damaged navigation equipment on the bridge, but with the support from the Italian Navy the steering and propulsion systems were repaired. The vessel sailed under escort with the Italian Navy vessel towards Nigerian waters and then continued its sail to Lagos escorted by a Nigerian security vessel.

Current Threat Levels

Senegal: **LOW**

Guinea: **MEDIUM**

Sierra Leone: **MEDIUM**

Liberia: **LOW**

Cote d'Ivoire: **MEDIUM**

Ghana: **MEDIUM**

Reports 18 - 24 January 2024

Nothing to report.

Analysis

Takoradi has a consistent record of security incidents at anchorage, with robbers and thieves targeting vessels for opportunistic theft of valuable items. Most flee once alarm has been raised and they are aware they have been spotted by the crew. All incidents should be reported to local authorities.

There have been a number of security incidents against local fishing vessels in this area in the last few months. Local reporting and type of attacks suggest either fishing disputes or the involvement of drug smuggling gangs, with some vessels involved in these attacks previously being detained for drug smuggling.

The threat of piracy is higher in the eastern half of Ghana waters. There is a high risk of theft, robbery and stowaways at all ports in West Africa. Guinea in particular has a history of violent robbery incidents.

Last Incident

- **2 October 2023. Theft (successful). Takoradi Anchorage, Ghana.** Two robbers boarded a containership at anchorage, whilst two other accomplices remained in a canoe alongside. Once spotted, the crew raised the alarm onboard which led the robbers to flee the vessel. They had stolen 15-20m of wire rope and the cover of a hawsepipe. Local authorities were informed and a security vessel came to the vessel about half an hour later.

Current Threat Levels

Theft, Robbery & Stowaway

Cameroon: **MEDIUM**

Eq Guinea: **LOW**

Sao Tome & Principe: **LOW**

Gabon: **MEDIUM**

Piracy & Kidnap for Ransom

Cameroon: **HIGH**

Eq Guinea: **HIGH**

Sao Tome & Principe: **HIGH**

Gabon: **HIGH**

Reports 18 - 24 January 2024

Nothing to report.

Analysis

The threat at anchorages in countries aside from Nigeria should be considered high, as pirates target alternative locations and vessels should remain extremely vigilant. It is likely that a pirate group based on out Akwa Ibom State in Nigeria is carrying out these attacks.

There remains a high risk of piracy attack and kidnap in the waters of countries outside of Nigeria, especially Cameroon, Sao Tome and Principe and Equatorial Guinea. In recent attacks, pirates have demonstrated their reach - outside of the EEZ and out of the reach of Naval forces and commercial security services. Vessels should avoid "no-mans-land" areas where security is very thin.

Last Incident

- **1 January 2024. Kidnap for Ransom. 30nm S of Malabo, Equatorial Guinea.** A chemical tanker was reportedly boarded by pirates in Equatorial Guinea's EEZ while en route to Douala from Abidjan. The tanker carried out evasive manoeuvres, but the pirates were able to make the vessel reduce its speed in order to board. Nine crew members were kidnapped, including the Master, chief engineer, and all other deck officers. A crew member took control of the vessel after the incident and sailed to Douala, where the vessel arrived the following morning and reported the attack.

Current Threat Levels

Theft, Robbery & Stowaway

Rep of Congo: **MEDIUM**

DR of Congo: **MEDIUM**

Angola: **HIGH**

Piracy & Kidnap for Ransom

Rep of Congo: **MEDIUM**

DR of Congo: **MEDIUM**

Angola: **MEDIUM**

Reports 18 - 24 January 2024

Nothing to report.

Analysis

The threat across the region should be considered high now that pirates have demonstrated the capability to operate at significant distances offshore and away from the Niger Delta. In particular small product and bunker tankers should be extra vigilant, as they provide relatively low freeboard, cargo that is attractive for the black market and crew to kidnap. They also often spend a significant amount of time in the region, possibly allowing intelligence on the vessel to be collected by pirate group networks.

Thefts and robberies remain a consistent threat at anchorages in the region, especially Luanda, Soyo and Matadi.

Last Incident

- **14 January 2024. Theft (Successful). Soyo Anchorage, Angola.** A vessel was boarded by sea robbers at the Soyo outer anchorage. The crew discovered that mooring lines were missing during the morning round check. The robbers were not detected during the robbery.

Niger Delta Militancy, Community Conflict and Industrial Action

Militant Activity

Statements & Threats

Nothing to report.

Attacks

Nothing to report.

Community Conflict

There is a high level of cult- and gang-related violence in Rivers, Bayelsa and Delta states. This includes kidnapping, violence between rival gangs and vigilante actions by cults and community groups. Local military and law enforcement actions do not always improve the situation.

Industrial Action

Nothing to report.

Current Militant Threat Level: MEDIUM

Current Community Threat Level: MEDIUM

Current Strike/Industrial Action Threat Level: HIGH

The Nigerian Ports Authority (NPA) has announced that Lekki Deep Seaport successful berthing its largest container ship on Sunday. The Maersk Edirne, at 13,092 TEUs, is the largest vessel to ever sail Nigerian waters. The vessel is one of 13 large container vessels which form the new CMA CGM WAX service that will operate along key locations including Xiamen, Qingdao, Shanghai, Singapore, Lekki Port, and Abidjan. According to the NPA, the vessel's berthing "represents a quantum leap forward" for the Lekki Deep Seaport, stating that it will contribute positively to Nigeria's economy and marks the beginning of Lekki's status as a maritime hub in Sub-Saharan Africa. (Source: THISDAY, The Cable)

The Petroleum and Natural Gas Senior Staff Association of Nigeria (PENGASSAN) has faulted the planned sale of Shell's onshore assets in Nigeria. The news comes following the oil giant's announcement last week that the Shell Petroleum Development Company Limited (SPDC), Shell's onshore assets in Nigeria, would be sold to the Renaissance Group, a consortium of local businesses. PENGASSAN has alleged that the Renaissance Group is an assembly of unknown entities with no proven track record in managing diverse assets. The association's General Secretary has stated that any attempt to transfer the asset without resolving issues affecting its members would be met with resistance. The association has also stated that after reviewing the union's Shell/SNBO branch presentation that was presented to its members, it has rejected all the terms affecting employees. The PENGASSAN chief said the group must come clean with its intention(s) and be ready to have a serious engagement with the association. (Source: The Guardian Nigeria)
